UK RIGHT TO WORK: Skilled Worker Dependent Visa

PROFESSIONAL PROFILE

Senior Frontend Engineer with 7+ years experience delivering scalable enterprise web applications with React.js, Next.js, TypeScript, Redux and StencilJS. Strong in frontend architecture, design systems, reusable components, automated testing, CI/CD, responsive UI, accessibility and performance optimisation. Experienced in leading teams, mentoring engineers, code reviews and stakeholder collaboration across enterprise, analytics, workforce management and payment platforms. Most recently delivered enterprise frontend solutions for Citi through Altimetrik.

CORE SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Router, StencilJS, HTML5, CSS3, SCSS, Styled Components

Testing: Jest, React Testing Library, Cypress, Vitest, Enzyme, MSW, Unit, Integration and E2E Testing

Engineering: Frontend Architecture, Design Systems, REST APIs, Responsive Design, Accessibility (WCAG), Performance Optimisation, Code Splitting, Lazy Loading

Delivery: Git, GitHub, Bitbucket, Webpack, Vite, npm, Yarn, Jenkins, CI/CD, Agile Scrum, Sprint Planning, Code Reviews, Technical Mentoring

AI: GitHub Copilot, Claude Code, Gemini, OpenAI Codex, Prompt Engineering, AI-Assisted Development

PROFESSIONAL EXPERIENCE

ALTIMETRIK — Senior Engineer, Product & Platform Engineering | July 2022 – September 2026

Client: Citi | Custody Security Ledger (CSL) — Successfully cleared the Karat technical interview/assessment and selected for the Citi account.

- Develop enterprise-grade frontend functionality for Citi's Custody Security Ledger, including transaction and position search workflows.
- Developed reusable React/TypeScript components and enterprise data-grid workflows using AG Grid for Citi's Custody Security Ledger platform.
- Implemented filtering, grouping, pagination and field validation to support enterprise transaction and position search workflows.
- Manage application state with Redux Toolkit; implement routing with React Router; integrate secure OIDC-authenticated API workflows and real-time data rendering.
- Improve reliability through automated testing with Vitest, React Testing Library and Mock Service Worker (MSW).

DEX WorkBench — Frontend Lead

- Led a team of 6 frontend engineers, driving sprint execution, quality, releases and production stability.
- Delivered workforce and resource-management modules covering candidate recommendations, interviews, employee tracking, resource allocation, WFH/WFO and staffing workflows.
- Implemented Role-Based Access Control, executive approval workflows, analytics dashboards, utilisation reports, staffing insights and hiring statistics.
- Established reusable React/TypeScript/Redux architecture; maintained 70%+ automated test coverage and managed Jenkins CI/CD pipelines.
- Partnered with architects, product owners, delivery managers and business stakeholders; conducted code reviews and mentored developers.

MORPH — Altimetrik Design System

- Architected and developed an enterprise design system using StencilJS and Web Components.
- Built 25+ reusable UI components and a React documentation portal with showcases, guidelines and interactive examples.

Pre-BGV Portal

- Developed and enhanced employee verification workflows using React.js and TypeScript.

UXD Website & Competency Portal

- Led end-to-end development using JavaScript, HTML, CSS and SCSS, with responsive, reusable and performance-focused UI.

Client: Intuit — NGP Payment Gateway

- Developed address management and Google Maps integration with React.js/TypeScript and maintained Cypress E2E coverage for critical payment workflows.

TATA CONSULTANCY SERVICES (TCS) — Assistant System Engineer | January 2021 – July 2022

- Developed frontend architecture for CNA's ScheduleF project using React and Redux.
- Collaborated directly with the client during Agile sprint planning and delivery activities.
- Improved code quality and reliability, achieving an 80% automated test coverage benchmark.

NEXGWEB TECHNOLOGIES — Application Developer | June 2017 – August 2018

- Developed user-friendly interfaces for SAHATTY, a bilingual Arabic/English open-source iOS healthcare application.
- Managed App Store deployment activities supporting application release and delivery.

SELECTED STRENGTHS

- Frontend architecture and scalable component design
- Enterprise UI engineering and design systems
- Technical leadership, mentoring and code reviews
- Automated testing, CI/CD and production support
- Stakeholder communication and Agile delivery

CERTIFICATIONS & AWARDS

- **Certifications:** Foundations of Generative AI (Simplilearn); Start Writing Prompts Like a Pro; Claude Code for Vibe Coding; Gemini for End-to-End SDLC.
- **Awards:** Trendsetters Award; Rise and Shine Awards; GEM Award.

EDUCATION

M.Tech in Cybersecurity — Jawaharlal Nehru Technological University (JNTU), Kakinada | 2018-2020 | 82%

B.Tech, Computer Science & Engineering — Pragati Engineering College, affiliated with JNTUK | 2013-2017 | 75%
