PROFESSIONAL PROFILE

Senior Frontend Engineer with 6+ years of experience designing and delivering scalable enterprise web applications using React.js, Next.js, TypeScript, Redux, and StencilJS. Proven expertise in frontend architecture, design systems, reusable component development, testing automation, CI/CD, and team leadership.

Experienced in leading frontend teams, collaborating with stakeholders, mentoring engineers, and delivering high-quality products that support business-critical workflows. Strong background in enterprise platforms, analytics dashboards, workforce management systems, and design system architecture.

CORE SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Router, StencilJS, HTML5, CSS3, SCSS, Styled Components, Bootstrap, Ant Design
- **Testing:** Jest, React Testing Library, Cypress, Enzyme, Unit Testing, Integration Testing, E2E Testing
- **Build & Tools:** Git, GitHub, Bitbucket, Webpack, Vite, npm, Yarn, **Vercel, Firebase (Hosting/Firestore)**,
- **Web Technologies:** REST APIs, JSON, Responsive Design, Cross-Browser Compatibility, Accessibility (WCAG), Performance Optimization, Code Splitting, Lazy Loading
- **Methodologies:** Agile Scrum, Sprint Planning, Code Reviews, CI/CD, Team Collaboration, Client Communication, Technical Mentoring
- **AI-Assisted Development & Productivity:** GitHub Copilot, Claude Code, OpenAI Codex, Gemini, Prompt Engineering, AI-Assisted Development.

PROFESSIONAL EXPERIENCE

ALTIMETRIK

Senior Engineer – Product and Platform Engineering (July 2022 to Present)

DEX WorkBench

- Led frontend development and delivery of **DEX WorkBench**, an enterprise workforce and resource management platform used by all **employees, recruiters, delivery managers, and business stakeholders** for talent acquisition, staffing, project planning, and workforce analytics.
- Led a team of 6 frontend engineers, ensuring successful sprint execution, on-time deliveries, and minimal production issues.
- Developed end-to-end modules for candidate recommendations, interview management, interviewer feedback collection, employee tracking, resource allocation, WFH/WFO management, and staffing workflows using a **role-based access control (RBAC) architecture** supporting recruiters, delivery managers, project managers, business stakeholders, and leadership teams.
- Designed and implemented business workflows enabling project managers to create resource requests, initiate project staffing proposals, and manage executive approval processes.

- Built interactive analytics dashboards and visualization modules providing project health metrics, utilization reports, staffing insights, hiring statistics, and client engagement reporting.
- Established reusable frontend architecture using React.js, TypeScript, Redux Toolkit, and REST APIs.
- Achieved and maintained **70%+ automated test coverage** using Jest, React Testing Library.
- Managed Jenkins deployment pipelines and resolved build, deployment, and production support issues.
- Collaborated with architects, delivery managers, product owners, and business stakeholders to translate complex requirements into scalable enterprise solutions.
- Conducted code reviews, mentored developers, and promoted frontend engineering best practices across the team.

MORPH – Altimetrik Design System

- Architected and developed MORPH, Altimetrik's enterprise design system using StencilJS and Web Components.
- Built 25+ reusable UI components adopted across multiple enterprise applications, reducing duplicate development effort and improving UI consistency.
- Developed a React-based documentation portal featuring component showcases, implementation guidelines, and interactive examples.
- Improved development consistency and accelerated feature delivery through standardized UI patterns.

Pre-BGV Portal

- Developed and enhanced the Pre-Background Verification portal using React.js and TypeScript.
- Streamlined employee verification workflows through scalable and maintainable frontend solutions.

UXD Website & Competency Portal

- Independently led the end-to-end development of the UXD Website and Competency Portal using JavaScript, HTML, CSS, and SCSS.
- Developed responsive and reusable UI components with a strong focus on performance, maintainability, and cross-browser compatibility.
- Collaborated with stakeholders to translate business requirements into scalable and user-friendly web applications.

NGP Payment Gateway (Intuit)

- Developed address management features and Google Maps integration using React.js and TypeScript for Intuit's payment gateway platform.
- Created and maintained Cypress E2E test suites for critical payment workflows, improving application reliability and release confidence.
- Collaborated with cross-functional teams to deliver scalable and user-friendly payment experiences.

Tata Consultancy Services

Assistant System Engineer (Jan 2021 - July 2022)

- **Developed** the frontend architecture for CNA's ScheduleF project using React and Redux.
- **Collaborated** directly with the client during agile sprint planning phases.
- **Optimized** code quality, achieving an **80% automated test coverage** benchmark.

NEXGWEB Technologies

Application Developer (Jun 2017 to Aug 2018)

Developed user-friendly interfaces and managed the App Store deployment process for SAHATTY, a bilingual (Arabic/English) open-source iOS healthcare application.

CERTIFICATION & AWARDS

- **Awards:** [1 Trendsetters award](#) , [2 Rise and shine awards](#) , [1 GEM Award](#)
- **Certifications:** [Foundations of Generative Ai by SimpleLearn](#) , [Start writing prompts like a pro](#) , [Cluade Code for Vibe Coding](#) , [Gemini for end-to-end SDLC](#)

EDUCATION

M.Tech in Cybersecurity

Jawaharlal Nehru Technological University (JNTU), Kakinada | 2020

Percentage: 82%

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Pragati Engineering College, affiliated with JNTUK | 2017

Percentage: 75%
